

PRODUCT DATASHEET

RECONDITIONED THREE PHASE METERS (DIRECT CONNECTION)

Models covered in this document include:

- 3P100DIG 100A Digital
- 3P100ANL 100A Analogue
- 3P100DIGD/T 100A Digital Dual Tariff

All models are 3 X 240/415V 50Hz credit meters with Loop In / Loop Out British Standard meter connections, Sealable case and Terminal covers, fully insulated. Meters will read unbalanced loads.

Installation Instructions for 3P100ANL, 3P100DIG and 3P100DIG/DT

There are four pairs of terminals underneath the front cover; these must be connected as follows:

1	2	3	4	5	6	7	8
BROWN		BLACK		GREY		NEUTRAL	
MAIN	LOAD	MAIN	LOAD	MAIN	LOAD	IN	OUT

On the 3P100DIGD/T only, there is a small terminal between the 'Main' & 'Load' terminals; this is for connection to a Time Switch (to be ordered separately) to switch between tariffs (switched neutral only); note that there are only two connections needed to a Time Switch.

Because these units are reconditioned models from various manufacturers it is not possible to give accurate dimensions or weights.
